🪪 Profile

I'm a driven and dedicated software developer over 2 years of project-based experience.I bring a strong work ethic and attention to detail to every project. My dedication to every project and excellent communication skills have made me an asset to my clients and employers. I am always eager to learn new things and am hardworking in nature. My ultimate goal is to improve the standard of living through the use of modern technology.

💼 Professional Experience

DIR-ACE Technology   12/2022 - present
Programmer   Yangon,
                                                                                    Myanmar (Burma)
- I have worked on 5+ Japanese offshore outsourcing projects for the DIR Finance Department.
- My experience with Oracle databases and Informatica Power Center was instrumental in the success of these projects.
- To ensure the highest levels of quality, I developed and executed 1000+ unit and integration tests, implementing rigorous testing protocols throughout the software development cycle.
- In addition, I had the opportunity to collaborate with 12 senior team members, learning valuable techniques for writing practical code.
- I also mentored 4 junior team members, providing guidance and support as they became familiar with the challenges of offshore projects.
- I got Offshore Technical (Level 1) Certificate from DIR Offshore Department in April, 2023.
- I am currently developing an automation tool for supporting daily and weekly tasks to increase productivity.

Shadow Pro Solutions   05/2021 - present
Programmer (Part-Time)   Yangon,
                                                                                    Myanmar (Burma)
- As a collaborative member of a project team, I contributed to the development of more than five innovative, high quality software solutions in an Agile development environment.
- My expertise in software development allowed me to successfully design, develop, and modify news websites, e-commerce platforms, and educational platforms according to client requirements.
- Additionally, I supported the implementation of software application changes, working under aggressive deployment timelines to ensure timely delivery of results.

Technomation   01/2021 - 04/2021
Junior Programmer   Yangon,
- As an entry-level programmer, I designed and developed websites using PHP   Myanmar (Burma)
  and the Yii2 Framework.
- I paid close attention to detail and ensured that all software was
  thoroughly tested, meeting the testing requirements in both the unit and
  integrated testing cycles.
- Additionally, I maintained effective communication with my team members and
  supervisors, seeking feedback and direction to ensure that the website was
  developed in alignment with project objectives.

🧠 Skills

Backend Development (Java, Spring MVC, Spring Boot, PHP, Laravel)

Frontend Development (HTML, CSS, Bootstrap, JavaScript, Vue, Angular)

Mobile Development (Flutter, Android (Kotlin))   **Database** (MySQL, Oracle SQL, Mongo DB)

Cloud (AWS)   **Version Control** (Git)

IDE (Eclipse, WebStorm, PHP Storm, Xcode, Android Studio)

Operating System (Linux, Mac, Windows)

🌐 Languages

Japanese   **English**   **Burmese**
N4   Intermediate   Fluent

🎓 Education

Level 5 Diploma in Computing (L5DC)   03/2023 - present
NCC Education   London,
- In March 2023, I embarked on a new academic journey, studying dynamic   United Kingdom
  websites and PHP, Information System Analysis, and Network Security and
  Cryptography.
- I am excited about this opportunity to expand my knowledge and skills in
  these areas, which I believe will be highly valuable in today's rapidly
  evolving digital landscape.
- By delving deeper into these subjects, I hope to gain a more comprehensive
  understanding of website development, data security, and network analysis,
  and to apply these skills to real-world scenarios in the future.

Diploma in Cloud Computing   11/2020 - 02/2021
Y-Max University   Yangon,
- I have successfully completed courses in Fundamental Cloud Computing and   Myanmar (Burma)
  Amazon Web Services, which has sparked a strong passion within me.

- I am particularly enthusiastic about these diploma courses, as they provide
  me with the opportunity to explore and develop my skills in cloud computing
  and AWS.

Third Year (Computer Science)   12/2017 - 03/2020
University of Computer Studies, Yangon   Yangon,
- As a former third-year computer science student, my education was   Myanmar (Burma)
  interrupted by the COVID-19 pandemic and a military coup. In response to
  the pandemic, schools and universities across the country, including my
  own, were closed for two years.
- Despite attempts by the Junta Military to reopen the schools and exert
  their control, myself and many other students chose to participate in a
  non-violent civil disobedience movement by not attending courses.
- Prior to these events, I excelled in Java Programming, Database Management,
  and Physics during my time at UCSY.
- One of my proudest achievements was being selected as a National Finalist
  for Myanmar in the ASEAN Data Science Explorer competition in 2019.
- Despite the challenges and disruptions, I remain deeply passionate about
  computer science and look forward to resuming my education and career in
  this field.

🎗 Awards

National Finalist   09/2019
ASEAN Data Science Explorer (2019)
I participated in the analysis of the Sustainable Development Goal (SDG) of
Good Health and Well Being as part of the ASEAN Data Science Explorer
competition in 2019. I was honored to be selected as one of the top ten
finalists in Myanmar for this competition.
